What's new at the track?

Currently the Rhodes Park Race Facility resource consent is being processed by TCDC and EW.

Over the past months, committee members have been working closely with Thames planners, engineers, TCDC and EW to ensure the resource consent to make changes to the Rhodes Park facility is passed without question. The consent will allow us to establish a carpark area, create drainage, construct a storage facility and building two tracks with jumps, whoops and berms.

Once the consent is given we are calling for funding and quotes for the above work to be completed.

For further information please contact either Shaun Mason on 0275339231 or Mike Veal on 0274984790
